

18 May 2026 (MON) – Chitwan → Bandipur → Pokhara						
Period	Time	Activities	Resource Person	Mode of Transport	Remarks	Learning Objectives
Morning	6:15 AM	Breakfast at Tiger Wildlife Camp (45 mins)	Tiger Wildlife Camp		At hotel	Depart Chitwan; travel-day safety briefing
	7:00 AM	Depart Sauraha towards Bandipur via Mugling; stop to observe landslide sites along the road (~3.5 hrs to Bandipur)	Program team	Bus	3.5 hrs via Mugling; stop for landslide observation	Observe slope instability and road engineering responses along Chitwan–Mugling corridor
	11:00 AM	Lunch at Siddhartha Hotel, Bandipur				
Afternoon	12:00–1:30 PM	Community interaction at Siddhartha Hotel, Bandipur – led by Bikram Piya (President, Rotary Community Corps) with Bandipur Municipal authorities, homestay and hotel entrepreneurs; Brief exploration of the Bandipur old town (liaison: Prem R. Kunwar)	Bikram Piya (Rotary Community Corps), Bandipur Municipality, local entrepreneurs, Prem R. Kunwar	Walk	1.5 hrs	Examine Bandipur as a case study in heritage-led tourism, Newari cultural conservation, and community entrepreneurship
	3:00 PM	Depart Bandipur by bus to Pokhara (~3 hrs)		Bus	3 hrs	
	~6:00 PM	Arrival at Hotel Pauwa, Pokhara – settle in	Hotel Pauwa			
Evening	Evening	Reflective journaling, photo editing, captioning and social media posting	Self-directed			Reflect on heritage-landscape-economy linkages; document Bandipur old town through photography

19 May 2026 (TUE) – Pokhara: Fewa Watershed EbA Transect						
Period	Time	Activities	Resource Person	Mode of Transport	Remarks	Learning Objectives
Morning	Breakfast	Breakfast at Hotel Pauwa before departure	Hotel Pauwa			Orientation to Fewa watershed transect and EbA (Ecosystem-based Adaptation) framework
	8:30 AM	Depart Lakeside (742 m) → Thulakhet, Ward 23, Pokhara Metropolitan; Observation of Khahare Khola siltation dam – field observation and introductions; Invite ex-teacher Mr. Sunar	EbA Expert Dil Bahadur Bhattarai, Mr. Sunar	Vehicle + walk	Field observation site – Ward 23	Understand siltation dam function, landslide history, and community roles in watershed protection along Khahare Khola
	9:30 AM	Khahare Khola → Dunde Fant: Field observation & community interaction – history of landslides and impacts; bio-engineering and Nature-Based Solutions (NbS); health and social sector linkages	Dil Bahadur Bhattarai, community members	Walk / transect		Apply NbS and bio-engineering concepts to field observations; understand community health linkages in watershed management
	11:00 AM	Dunde Fant → Bhanjyang (2,100 m): Conservation pond observation – transect walk around Bhanjyang; scaling up of EbA program; local government initiatives for Panchase area conservation; Optional: hike to Panchase top (2,500 m)	Dil Bahadur Bhattarai, Pokhara Metropolitan	Walk (uphill)	Optional: Panchase summit hike to 2,500 m	Understand scaling of community-led EbA conservation; examine local government watershed governance
	1:00 PM	Lunch – dal, bhat, tarkari at Bhanjyang	Local community		Community lunch at Bhanjyang	
Afternoon	2:00 PM	Bhanjyang → Sidhane Community: Local water source conservation; bio-engineering good practices; homestay and animal shed observation; Gurung Museum visit – themes: culture, nature, livelihood	Sidhane community, Gurung Museum	Walk		Examine water source conservation and Gurung cultural heritage as integrated livelihood and adaptation resources

	3:00 PM	Sidhane → Damdame: Beekeeping & broom grass plantation observation – community interaction	Damdame community farmers	Walk		Understand climate-adaptive community enterprises (beekeeping, broom grass) and their livelihood benefits
	4:30 PM	Damdame → Ghantichina: Observation of Harpan Khola siltation dam	Dil Bahadur Bhattarai	Walk		Synthesise upstream-to-downstream watershed dynamics through final siltation dam observation
	5:15 PM	Return to Pokhara – overnight stay at Hotel Pauwa		Vehicle	Altitude range: 800 m (Lakeside) to 2,200 m (Bhanjyang); opt. hike to 2,500 m	
Evening	Evening	Reflective journaling, photo editing, captioning and social media posting	Self-directed		All sites within Pokhara Metropolitan area	Synthesise full watershed transect observations; document bio-engineering, siltation dams, and community interactions through photography

20 May 2026 (WED) – Pokhara: Hospital Visit & Free Time						
Period	Time	Activities	Resource Person	Mode of Transport	Remarks	Learning Objectives
Morning	Breakfast	Breakfast at Hotel Pauwa	Hotel Pauwa			Orientation to hospital visit and urban health themes for the day
	8:30 AM	Depart Hotel Pauwa → Manipal Medical College		Vehicle		

	9:00 AM	Manipal Medical College – Disease Epidemiology session: Community Medicine Department presents on Epidemiological Transition, effects of urbanisation and climate change on disease patterns	Community Medicine Department, Manipal Medical College	At hospital	Understand epidemiological transitions driven by urbanisation and climate change; apply One-Health framing to disease burden
	9:00–11:00 AM	Hospital tour and hospital waste management site visit – tour of hospital OPDs and hospital waste management site	Manipal Medical College staff	Walk (within hospital campus)	Examine hospital waste management systems and healthcare infrastructure in a regional urban context
Afternoon	11:00 AM onwards	Free time – explore Pokhara independently (Lakeside, Phewa Lake, local markets, World Peace Pagoda, etc.)	Self-directed	Own transport / walk	Self-directed exploration of Pokhara urban environment; personal reflection on program themes
Evening	Evening	Reflective journaling, photo editing, captioning and social media posting	Self-directed		Informal reflection on urban health themes; document Pokhara city environment through photography
